\* The Domain I–IV targets used to determine A–F ratings for the January 1, 2017, report are based on the rating cut points determined by the commissioner of education for the purpose of demonstrating one possible, but not necessarily the final, approach. The final targets used for the A–F ratings assigned in 2017–18 are scheduled to be adopted in the Texas Administrative Code in spring 2018.

\*\* Tools to enable districts to calculate A–F values in this domain will be available in early 2017. Domain III targets for 2017–18 will be held constant based on the formulas derived from the 2016–17 assessment data.

\*\*\* The Domain IV scores for elementary and middle schools will be calculated to the tenth of a point.
